SAVING THE BATS

Description:

The website will be for a fictional organization that is saving bats in North America. There are diseases like white nose syndrome and environmental factors like habitat loss and windmills that are resulting in a loss of bat population in North America. This website will be all about how people can donate or get involved themselves. There will be items they can buy to support the organization and ways to interact. There will also be information about bats like bat breeds and how to interact with them safely and such.

Pages:

1. Contact
   This page will include how to contact the organization, how to contact local wildlife safety officials, and anyone else that might pertain to helping or dealing with bats in your local area
2. Shop
   Items for people who are interested in purchasing such as merchandise, bat products, etc.
3. Bat Safety
   All the possible safety protocols necessary for dealing with bats yourself.
4. Bat Breeds
   All the types of bat that inhabit North America, information about their behaviors and environments, and how to interact with them.
5. News
   Any new updates, articles, or other information that the organization may want to share including new research into white nose syndrome, statistics on bats, etc.

Data:

There will be a list of merchandise that people can purchase such as shirts (size, quantity) as well as actual tools for helping bats like the materials to make a bat enclosure (size, quantity) and supplies to care for injured or diseased bats like bat transports (quantity) and food for them (type of insect, quantity). There will also be lists of information about the breeds (breed, behavior, environment, specialized safety instructions) and safety protocols (how to interact, protective gear necessary, emergency number). There will also be lists of news articles (title, date, author, body). There will also be accounts so that only the organization can edit anything and so the users will be able to purchase things. The website will also use a slideshow and information verification to incorporate javascript.
